The information disclose statement filed 4-9-2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Items 48-53 are missing from the application file. Applicant is required to submit a legible copy of 48-53.

Prior art cited

2. Although the prior art discloses several claimed limitation, for example:
Hussain et al. (U.S. patent 6,172,611) discloses monitoring a thermal state of a system includes a thermal management integrated circuit (IC). The thermal management IC is coupled to receive a remote temperature signal. The remote temperature signal is indicative of a system temperature. The thermal management IC includes a software programmable temperature threshold setpoint, and a hardware programmable temperature critical threshold setpoint.

Allowable Subject Matter

3. Claims 37-40 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Independent claim 37 contains allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding claim 37:

The primary reason for the allowance of claim 37 is the inclusion of the apparatus including a fourth register to force the thermal management system active while overriding a disable bit provided by the first register. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 38-40 are allowed due to their dependency on claim 37.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
